* see below for details on the Market Action Index

The Market Action Index answers the question "How's the Market?" by measuring the current rate of sale versus the amount of the inventory.

Index above 30 implies Seller's Market conditions. Below 30, conditions favor the buyer.

SUPPLY AND DEMAND

Local conditions are currently quite strongly in the Buyer's Market zone (below 30). The 90-day Market Action Index stands at 17. With several months of inventory available at the current sales rate, buyers should find ample choice.

indications for the market.

We continue to see prices in this zip code hovering around these current levels, even though they bumped up a bit this week. Look for a persistent upshift in the Market Action Index before we see prices move significantly from here.
